PROFESSIONAL SUMMARY

DevOps Engineer with 1+ years of hands-on experience in automating AWS infrastructure using Terraform, building CI/CD pipelines with GitHub Actions, and implementing monitoring using Prometheus and Grafana. Proven ability to reduce operational overhead and cloud costs, strengthen cloud security through IAM best practices and SSO, and improving system reliability through observability and standardized DevOps processes.

PROFESSIONAL EXPERIENCE

Cubera | Bengaluru, India

Promoted from Intern to DevOps Assistant Engineer

DevOps Engineer

JANUARY 2025 – PRESENT

- Automated and managed AWS infrastructure provisioning using modular Terraform, deployed 25+ EC2 instances along with IAM roles and security groups across environments, reducing manual efforts by 70% while improving scalability, consistency and maintainability.
- Designed Grafana dashboards and Prometheus metrics for infrastructure and Kubernetes monitoring, increasing system health visibility by 60% and enabling faster incident response.
- Implemented IAM roles and policies following least privilege principles, enabling secure role-based access control for 10+ users and enhancing security.
- Designed and implemented CI/CD pipelines using GitHub Actions for automated build, test, and deployments workflows.
- Containerized applications using Docker to ensure consistency across development and production environments.
- Implemented Azure Single Sign On (SSO) integration with 5+ AWS accounts by configuring SAML authentication and setting up Azure AD as the identity provider. Created 10+ IAM roles to enable secure, centralized access management via SSO.
- Continuously monitored cloud costs, flagged anomalies, and owned issue resolution, including achieving a 62% reduction in unexpected charges.
- Authored comprehensive DevOps documentation and operational playbooks in Confluence, reducing procedural errors by 35% through standardized workflows.
- Designed and implemented an automated workflow in n8n to schedule and publish content across platforms including Facebook, Instagram, X (Twitter), YouTube, enhancing content delivery efficiency and reducing manual effort by 75%.
- Engineered secure VPN connectivity for AWS-hosted infrastructure by deploying and configuring OpenVPN Access Server, enabling internal access to Amazon RDS (PostgreSQL) instances.

TECHNICAL SKILLS

LANGUAGES: Python, Shell Scripting, JavaScript, HTML5, CSS3

PLATFORMS: Amazon Web Services (EC2, VPC, IAM, S3, CloudWatch, RDS), Google Cloud, Microsoft Azure, Linux (Ubuntu)

TOOLS: Terraform, Docker, Git, GitHub Actions (CI/CD), Prometheus, Grafana, MySQL, SQL, PostgreSQL, Jira, n8n, OpenVPN, Kubernetes

EDUCATION

REVA UNIVERSITY, Bengaluru, India

2024

MASTER OF COMPUTER APPLICATIONS

BANGALORE UNIVERSITY, Bengaluru, India

2022

BACHELOR OF COMPUTER APPLICATIONS

CERTIFICATIONS

- Certified in AZ-900: Microsoft Certified Azure Fundamentals 2024
- Certified in AI-900: Microsoft Certified Azure AI Fundamentals 2024
- Certified in Cisco Certified Support Technician Cybersecurity (CISCO) 2023

ACADEMIC PROJECTS

Recycling Drop-Off Store Locator

2024

- Designed and deployed a cloud-based application on Google App Engine, integrating Cloud SQL for data storage and Google Maps APIs for real-time, location-based services.
- Implemented API-driven location mapping for 25+ drop-off centres, ensuring scalable and reliable access to geospatial data.
